

# Holes

Warren Grieve

© matrixmoments.com 2010

A black hole with a swirling accretion disk against a starry background. The accretion disk is composed of concentric rings of gas and dust, glowing with a mix of purple, blue, and red hues. The center of the black hole is a solid black circle. The background is a dense field of stars of various colors and sizes.

An absence of something  
a place of nothing  
lonely space  
the eyes focus point  
the hearts waiting beat.

Holes

the bullets trace

deaths moment

an absence of life

Holes

Hands, feet and side

Pierced innocence

Forgiveness flowed

Pure sacrifice

Love poured

Holes
